To Whom It May Concern,

I have had the pleasure of working with Professional Mechanical Contractors for the past two years on the Wilshire Margot project in Westwood, California. A 96 unit Luxury Apartment Complex on the Wilshire Corridor. They maintained the aggressive schedule put forth by Taisei, and completed their contract work on time. They were eager to complete their change order work to facilitate staying on schedule.

They attended MEP coordination meetings early on, and were an integral part of the HVAC design process, working closely with the Mechanical Engineering Consultant. They exceeded our expectations with value engineering ideas to save the owner money.

They were always ready to problem solve when it came to troubleshooting coordination with other trades. Whenever a challenge presented itself, they responded in a timely manner to remedy the situation, often times with less than 24 hours notice.

When the job was complete, they completed their punchlist items and passed their final inspections with little to no deficiencies. When the owner requested follow up on tenant requests, they responded within 24 hours if not sooner, to provide 100% customer satisfaction.

I look forward to working with them on future projects.

Alexandra Craig
Project Engineer
